...with you to the finish !

PROCESS DRIVEN.

International Finishing Corp., strives to be an extension of your engineering resources. Over fifteen years of growth and partnered with world leading manufacturers: Rösler Metal Finishing, Stoelting Parts Cleaning, Ecoclean and Kyzen Chemical, we offer our commitment to develop and implement engineered deburring, finishing, cleaning, passivation and blasting solutions to your manufacturing needs.

With **Rösler**, the experience and quality of the world's largest manufacturer of surface finishing equipment is at your service. We supply engineered ceramic and plastic media for vibratory and high energy tumbling processes. We supply finishing compound solutions for cleaning, polishing, descaling and rust inhibiting including wastewater treatment solutions.

Stoelting's long history of manufacturing the highest quality conveyORIZED spray washing systems and Lewis Ultrasonic units provides a solid foundation to build the best process solution for your application.

Ecoclean provides precise global solutions to oil, coolant and chips removal from intricately machined components. Safe solvent cleaning is especially effective in Ecoclean's state-of-the-art vacuum-sealed degreasing systems, surpassing even the most stringent particulate specifications.

German technology and workmanship provide true state-of-the-art precision automated cleaning and / or passivation systems. Validation ready automation and software designs exceed the highly controlled requirements of Medical, Pharmaceutical, Optics and Aerospace applications.

Kyzen's global presence and unmatched technical support allows IFC to give our customers a virtual chemist on staff. From aqueous cleaners and corrosion inhibitors to the latest in environmentally sound solvents - backed by one of the most sophisticated test labs in our industry.

Our partnership with **Microfinish** offers complete process capability as a contracted outsource service center. Medical implant and device polishing, flight critical aerospace component finishing, tumble deburring, mirror polishing, laser engraving...

Microfinish, AS9100D and ISO9001: 2015 certified services a wide range of medical, aerospace, automotive and consumer product mfg concerns.

At International Finishing Corp., our expertise, personnel and resources are truly, with you to the finish!
