RE: Covid-19 Essential Business Declaration

To Whom it may concern:

In acknowledgement of the State of Ohio's recent declaration that non-essential businesses shall suspend operations, please note the following:

International Finishing Corp., LLC., is a metal finishing supply company actively engaged in the supply chain of mission critical military aircraft; turbine engine and landing gear components, medical devices, instruments and implant products.

International Finishing Corp., LLC., is considered an entity essential to infrastructure and national security under the currently published Department of Homeland Security pandemic response mandates and therefore, shall continue to operate during this Covid-19 related commercial quarantine shut down.

During this time, we understand that the continuity of our operations is imperative to support our customers of the same standing and we depend on our suppliers to assist us in meeting these requirements.

We appreciate all efforts and understanding in these exceptional times.

Sincerely,

Daniel O'Connor
